Kylle Ian D. Acibron

Full-stack developer in training

Bayawan City, Negros Oriental, Philippines · kylleacibron@gmail.com · github.com/kairu15

PROFESSIONAL SUMMARY

BS Information Technology student at Negros Oriental State University (NORSU-BSC) and aspiring full-stack developer. Builds practical web systems end to end — from MySQL schemas and application logic to responsive interfaces — using Django, Laravel, React, PHP and JavaScript. Current work includes a capstone dispersal tracking system for a City Veterinary Office, alongside portfolio projects for a pickleball facility and a hotel. Open to internships, OJT and junior developer roles.

EDUCATION

Bachelor of Science in Information Technology

2023 – Present

Negros Oriental State University – Bayawan–Sta. Catalina Campus (NORSU-BSC)

A degree program focused on software development, database systems, web technologies, and software engineering.

TECHNICAL SKILLS

Programming languages	Python, PHP, JavaScript
Frameworks	Django, Laravel, React
Databases	MySQL, SQLite
Front end	HTML, CSS, Tailwind CSS, Bootstrap
Tools and technologies	Git, GitHub, Docker, Vite
University coursework	Java, C++

EXPERIENCE AND PROJECTS

Intern Developer

2026 · On-site

NORSU-BSC (Negros Oriental State University)

Contributed to university web systems while gaining hands-on experience in software development, database management, and system administration.

Python · Django · PHP · Laravel · MySQL · JavaScript

CVO Dispersal Tracking System

Capstone project · in development

Laravel · React · MySQL · MapLibre GL · Docker · Expo

A livestock and poultry dispersal tracker for a City Veterinary Office, built end to end: a Laravel REST API of roughly 115 routes backed by 666 PHPUnit tests, a React staff interface with barangay-level geo-tagging on MapLibre GL, an Expo field companion and Docker Compose stacks.

PickleSphere

Portfolio project · no public deployment

Django · MySQL · Channels · Redis · Stripe

A Django pickleball facility platform built as a portfolio project: hourly court reservations with overlap protection, Stripe and GCash payments with tracked refunds, and tournaments with live WebSocket scoring over Channels and Redis — ten apps, 64 migrations and 296 automated tests.

Bayawan Bai Hotel Management System

Portfolio project · demonstration prototype

PHP · MySQL · JavaScript

A PHP and MySQL hotel management prototype built for portfolio demonstration, not a fully operational production system: a guest booking flow with an availability checker, front-desk operations and a 46-page administration panel over a 51-table schema.
